-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7, 10-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnett et al (US 5,494,674).

Barnett et al teach an electrostatic spraying of skin treatment agents (abstract). A composition comprising 65% DC344 and 30% ethanol is specified (column 8 lines 41-43), the same ingredients applicants disclose on page 7 line 8 and page 8 line 30 respectively. The latter is added to the former to adjust resistivity (column 5 lines 30-33). Propylene glycol is disclosed as equivalent to ethanol (column 4 lines 54-57). Efficiency, cost effectiveness, and safety are disclosed (column 2 lines 59-60).

It would have been obvious to one of ordinary skill to electrostatically spray skin treatment agents to achieve the beneficial effect of efficiency, cost effectiveness and safety in view of Barnett et al. As to the claimed emulsion, Barnett et al teach the electrostatic spraying of the same ingredients and percentages as those claimed by applicants, therefore, the same emulsion must be formed in situ as that claimed. Applicants argue that Barnett et al do not teach the claimed emulsion, but rather teach single phase compositions. However, applicants are silent regarding the above cited mixture of immiscible solvents which, when sprayed, it is argued, form the claimed emulsion.

No claims allowed.
